

maps matter to
energy

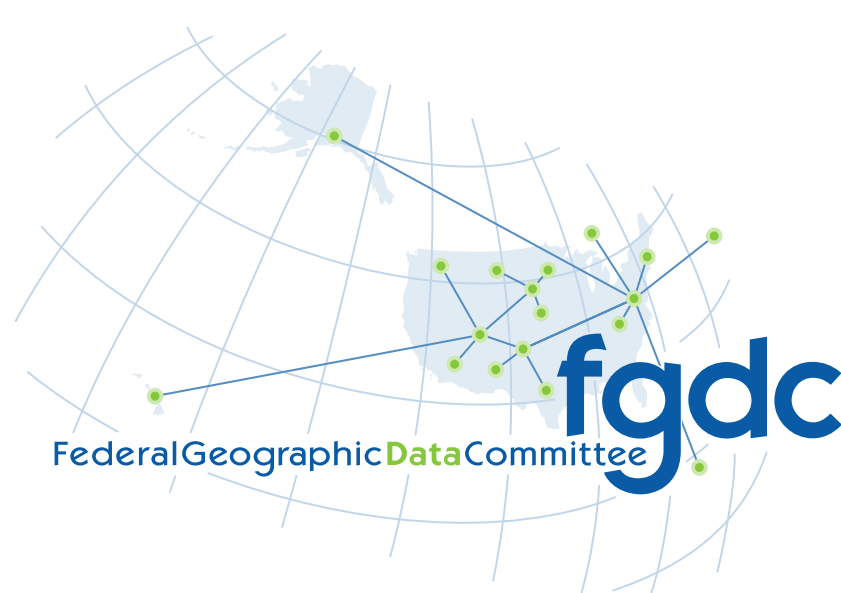

maps help find, develop and manage new sources of energy

Become a champion for GIS coordination and you could be saving more than just taxpayers' money.

Are all levels of government working together in your state to create maps that find, develop and manage new sources of energy? THERE IS A CRITICAL NEED to coordinate GIS activities. Coordination eliminates waste and improves efficiency.

There are thousands of government agencies carrying out the day-to-day tasks of reducing crime, enhancing public safety, containing costs, managing growth, improving accountability and protecting the environment. Nearly all of them rely on geographic information systems (GIS) technology to make decisions that directly affect citizens and determine our quality of life.

Be a **LEADER** in your community...become a champion for GIS coordination. Find out how by visiting <http://50states.nsgic.org>.
